How to Make a New Wiki

Follow the steps in this tutorial to create a new wiki using W&M Wikis.

Visit www.wmwikis.net

From the top right of the screen, select "join" or "sign in" to access W&M Wikis.
From the left side menu, select "Make a New Wiki".
1. Give your wiki a name. This will determine the url (electronic address) of your wiki. 2. Select whether you'd like your wiki to be public, protected, or private. You can always change this setting later. 3. Leave the wiki template area blank or select one of the existing templates if you are required to do so.
Voila! You have created a new wiki space. You should see the directions in the above image. You can delete the directions and begin creating pages and content.
